# PUSHBUTTON DEVICE

## HANDY PUSHBUTTON DEVICE FOR DIGITAL APPLICATIONS

The TGD-8 pushbutton device can be used versatily for the industrial sector, but also for mobile and customised applications. The transmitter has a highly ergonomic design and offers an easy and intuitive handling. To guarantee the most efficient operation to the user, the function keys can be flexibly assigned and configured. To protect your device against unauthorised use, we offer you highly modern security features as for example user-defined security codes.

# TGD-8

The TGD-8 pushbutton device is unique in its category due to its modern and economic design. The use of a new operating concept enables flexibility in all areas of application. The TGD-8 offers a STOP switch, a toggle switch and eight pushbuttons, which are executed in two steps each and can be individually labelled to suit the customer requirements for the application. Up to 6 vari-coloured feedback LEDs can be added to complement the status indication of your TGD-8 pushbutton device.
